

# TECHNICAL NOTE

## PORT MULTIPLEXING

### WHAT ARE WE DOING?

Even though a distribution valve is integrated in our syringe pumps, you might still need more ports for your application.

Using any of our distribution valves, it is possible to achieve port multiplexing. The number of valves you use is the limit.

Be creative for your setup!

### WHAT'S IN IT FOR YOU?

- Repeatability
- Automated system
- Flow control
- Minimal bench space
- Multiplexing
